I would like to talk about Washi, traditional Japanese paper. Washi is made from trees. Recently, it was registered as a World Cultural Heritage Site. There are many places to make Washi in Japan. One of famous places is Ogawa machi in Saitama prefecture. The town was registered as one of the places of World Cultural Heritage Site.

Ogawa machi has a facility where adult and children can try to make Washi. Having such an experience is interesting and good for the future generations.
